GRIPPER EDGE

Dr. Delacour — Cornell July 7.—
for July 1 (be away until July 17 ofc.)

Mr. Cornell — Possibility of substituting
① some planting at west end in lieu of filling lake. A graded area unplanted will not only be unsightly but will be a dust menace for the neighborhood.
② Domes in the roof
③ What happened to the request for planting around the "new" pit?

Fred Monhoff MO 9211 ~~8-~~3877 (vacation middle July)

To get seal at C I T — wait for Beeson
Truck & rope & slipping blankets & boards & slide it on also a hand truck, chain block & draw hand truck on & truck.

Dr. Delacour — July 1

I would like to get together a group to discuss plans for H. P. development — beds
Necessary & have plans ready & before proceeding
Monhoff & Cornell
Wyld — Gehrig
You — me

If Dr. Knight still active in painting? Has he sold any of his paintings in 1952 how many units, If not tax exempt, the tax would have to be paid out of the $6000 Marcia Brady Tucker Foundation, Inc. making sale price $5797.10 + tax 202.90 = 6000.00

5800 × 35 = 24000 + 17400 = 203000

5800 − 203 = 5793

5790 × 35 = 28950 + 17370 = 202650

5780 × 35 = 28900 + 17340 = 202300

5700 × 35 = 28500 + 17100 = 199500

5797 × 35 = 28985 + 17391 = 202891

5797.10 × 35 = 28985.50 + 17391.30 = 202898.50

5797.10 + 202.90 = 5999.89

Any # you wish – Half? Shut all if you like & we pay for half or more orders as you like

Purchased Cuts from M.C.Z. @ $250.00

Decided to value individual bones given by Wetmore or Ken exchange @ 5.00 each

At this rate Maracalla chip bones should be worth $10.00 each and the mount should be valued at the value of the bone, $350 plus the time spent in mounting. Total $1500?

Ask Mr. Otto

Mel's Bd request next meeting –

Ask Dr Delacour about a letter of introduction for Bonnie

Fossil postcards wanted: skunk, cat, mammoth, bones

Geo learned from Russ Albee Nov. 14, 1953
Silver is valued from $12.00 - 18.00 per lb
depending upon grade
@ $12 per lb our specimen - supposed
90% silver in a 50 lb piece = 45 lbs
= $540
@ $18 = $810
Value as a specimen is silver + display
value.

3 vols text + 171 handpainted plate of insects

"Insecten Belüstigung"

by August Johann Rosel von Rosenhof

and later by his son-in-law

C. J. C. Kleeman

Part 3 states date of pub. 1755. Text includes plates were first exhibited in 1740

4th ~~vol~~ part says 1761

Size of plate $7\frac{3}{4} \times 5\frac{15}{16}$ inches varies to $7\frac{7}{8} \times 5\frac{13}{16}$ inches

frame drawn around picture

$6\frac{9}{16} \times 5\frac{1}{16}$ + $6\frac{1}{16} \times 4\frac{15}{16}$

Suggested that four be placed on a mat (total of 25 mats). Holes to show printing (val. above & artist below) above & below pictures holes to be $7\frac{1}{4}$ or 7" high depending on picture (I would not take in everything on some plates)

Rosenhof born 1705, died 1759.

Painting is done with specially made pigment prepared from animals & plants (lavender from clams, black from wild apples. Color has stayed amazingly true.

Mr. Nollte come at 11 A.M. Wednesday

March 25 — 6-6:30 - Cronkrights - Amrit

ask about benches in county pool.
for Hancock Park

stepping stones out

With Gelvin & H.P. to examine streambed
3.25, 5'5'. Safety Engineer recommends
① Removal of stepping stone above fall
② Raising level of "fall" rocks & deepen pool
③ Fencing around culverts at SW end.
Our examination results as follows:
① Removal of 3 stepping stones (ends)
② Leave stones "as is" because raising would cause overflow back of pool.
Instead put 2 rail fence on either side of tube on bridges & plant shrubs near walk here.
③ Use 2 rail fence as on bridges
④ Install metal locked door over grating at upper end

Take hedge out along Wilshire
